

# User Manual

Group 3

6 December 2024

# 1 Objective Breakdown

## 1.1 Purpose

Want2Remember is a web and mobile application created to help individuals with cognitive challenges manage their daily lives more effectively. It allows users to track and organize important information, including:

- Memories
- To-do lists
- Appointments
- Contacts
- Payment details

This manual provides an overview of the system's functionality, design, and architecture to help users understand and use it efficiently.

## 1.2 Intended Audience

This document is tailored for:

- Professors and students in the California State University, Los Angeles (CSULA) Computer Science department.
- Employees of We2Link, the group responsible for Want2Remember's development.
- End users such as caregivers and individuals with memory-related challenges.

## 1.3 System Overview

Want2Remember uses a modular, component-based structure that ensures code reusability and simplifies the application's complexity. This architecture supports both mobile and web platforms to maximize accessibility and convenience.

# 2 Goals and Why It's Needed

## 2.1 Goals

Want2Remember aims to assist individuals dealing with memory-related issues, such as:

- Brain injuries
- Alzheimer's disease
- Other cognitive impairments

The application offers customizable templates to log and manage:

- Memories
- Passwords
- To-do lists
- Medications
- Appointments
- Contacts

## 2.2 Why It's Needed

Cognitive impairments can significantly impact a person's ability to live independently and maintain their quality of life. Want2Remember addresses these challenges by:

- Promoting independent living
- Supporting work and educational reintegration
- Enhancing social interactions and personal safety
- Facilitating collaboration between caregivers and users
- Organizing medical and personal records

By simplifying daily task management, the app increases user productivity and efficiency, empowering them to lead more structured lives.

## 3 How to Access Want2Remember

### 3.1 Access Methods

- **Web Access:** Visit the Want2Remember website. Log in or create an account to start using the application.
- **Mobile Access:** Download the Want2Remember app from your device's app store:
  - **iOS:** Available on the App Store.
  - **Android:** Available on the Google Play Store.

## Conclusion

Want2Remember provides a user-friendly platform for managing and tracking essential information for those facing cognitive challenges. By addressing both individual and caregiver needs, the application ensures improved organization and quality of life. With ongoing updates and user feedback, Want2Remember is set to remain a reliable and accessible tool for its users.
